

# Braille Alphabet

*Purpose: To explain how children without a sense of sight are able to read letters and words using their fingertips to locate patterns of raised dots.*

*Materials:*

- Glue*
- A copy of the second page*

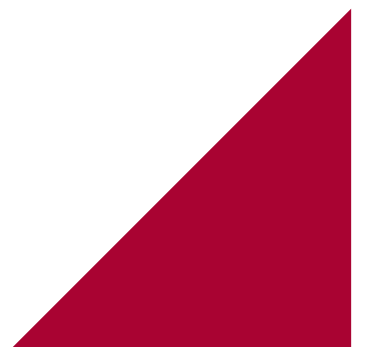

*Directions:*

- 1. Print out a copy of the second page.*
- 2. Put a drop of white glue over each black dot*
- 3. After the glue is dry you will be able to feel the raised dots with your fingers*

*Encourage your children to memorize the letters of the Braille alphabet!*
